Professional Summary

Results-driven Software Developer transitioning into AI/ML Engineering with over three years of experience in web application development, backend systems, databases, APIs, and scalable software solutions. Completed professional training in Python, Data Analytics, Data Science, Machine Learning, Generative AI, and Agentic AI at CS Infotech. Passionate about creating intelligent systems and AI-powered applications while developing automation workflows and data-driven solutions. Demonstrated expertise in enhancing algorithm performance and tackling complex data challenges, complemented by strong collaboration skills and proficiency in Python, TensorFlow, and data visualization to deliver impactful results.

Work History

Software Developer, TOXSL Technologies Pvt. Ltd - Engineered robust database structures to ensure secure and efficient data storage within Laravel and Yii frameworks. - Enhanced program performance through comprehensive code analysis and strategic implementation of improvements in Laravel and Yii applications. - Developed web applications utilizing HTML, CSS, JavaScript, PHP, and frameworks such as Laravel and Yii. - Executed debugging processes to identify and resolve errors in WordPress, Laravel, and Yii projects. - Leveraged Laravel Eloquent and Yii Active Record to optimize database interactions and enhance application logic. - Executed MVC architecture to enhance application structure and maintainability.	02/2024 – 03/2025 Mohali, India
Junior WEB Developer, TechArch Software's - Oversaw user account management and strengthened security protocols in WordPress and Laravel applications. - Implemented, configured, and maintained WordPress core, plugins, and themes to ensure security and compatibility. - Engineered responsive, user-friendly web interfaces utilizing HTML5, CSS3, JavaScript, and PHP for both WordPress and Laravel projects. - Developed custom WordPress themes and Laravel applications utilizing MVC architecture, Blade templating, and Eloquent ORM. - Executed integration of RESTful APIs, ensuring seamless data flow and system interoperability.	10/2023 – 02/2024 Panchkula, India
Junior WEB Developer, TechMind Software's - Developed custom post types, taxonomies, shortcodes, widgets, and additional features to enhance WordPress functionality for client-specific needs. - Developed custom page templates to streamline content creation for authors. - Executed troubleshooting and debugging processes on existing WordPress sites to enhance functionality. - Tailored existing themes to meet client specifications while ensuring compliance with coding standards and best practices.	02/2022 – 08/2023 Zirakpur, India

Sr. Software Developer, AGS Informatics

04/2025 – 01/2026

Banur, India

- Enhanced application performance by leading code refactoring and implementing advanced debugging techniques in Laravel projects.
- Executed deployment of applications to production environments utilizing version control systems, including Git.
- Engineered and deployed sophisticated web applications utilizing PHP, MySQL, JavaScript, HTML, and CSS.
- Implemented integration of third-party APIs, including payment gateways and SMS/email services, to enhance system functionality.
- Engineered custom Laravel features, including middleware service providers and artisan commands, to enhance application logic and performance.
- Utilized Laravel's routing queues and event system to architect scalable, modular web solutions.

Education

Bachelor of Computer Applications, Panjab University, Chandigarh

2021

Key Skills

Programming

Python, PHP, JavaScript

Web Development

HTML, CSS, JavaScript

Database Management

MySQL, SQLite

AI / ML Training

CS Infotech– Professional Training Program

01/2026 – 06/2026

- Python Programming
- Data Analytics & Data Visualization
- Data Science
- Machine Learning
- Generative AI (LLMs, Prompt Engineering, RAG Concepts)
- Agentic AI & AI Automation Workflows
